

## **Environmental Policy**

AMC Ireland fully accepts its responsibility to minimise the impact that its activities may have on the environment. Management and staff have undertaken to adopt and comply with an environmental policy appropriate for our activities.

The company understands its obligations to the community and the need to protect the environment from pollution and to where-ever use recycled product and to recycle any waste.

To help reduce the pollution from noxious fumes, heat and noise our vehicles will be regularly and properly serviced. Whenever practical we will use diesel fuel vehicles as this type of engine is most fuel efficient, so helping to reduce the level of fossil fuel burnt. All other vehicles now use unleaded fuel and most have catalytic converters fitted to reduce even more of the harmful gases.

The Directors of the Company are committed to ensure compliance with all Environmental Legislation and guidelines, which relate to employment and activities throughout Ireland.

This policy is communicated to all employees and is available to customers upon request.
